# Shahid Ali

Hyderabad, Sindh, Pakistan
+92-3406919051 shahidalileghari2021@gmail.com Linkedin Github

## EDUCATION

**Bachelor of Software Engineering** | Mehran University Of Eng. and Technology | Jamshoro, Sindh | 3.02/4 CGPA 2025
**12th | B.I.S.E Larkana**| GOVT. Degree College Khairpur Nathan Shah | | 96.94 AGGREGATE 2021

## Technical Skills

- **Technical Skills :** DSA, Computer Networks, Operating Systems, Distributed Systems, DBMS, SDLC, OOP,
- **Languages :** Java, Python, Dart, HTML/CSS.
- **Frameworks/Runtime Environment :** Flutter, Express.js, Node.js.
- **Developer Tools :** VS Code, Eclipse, AWS Cloud, Google Cloud, Git, Android Studio.

## WORK EXPERIENCE

### Flutter Developer Intern - EduCreators **February 2024 - April 2025**
Onsite - Jamshoro, Sindh, Pakistan

- **Designed** and developed the EduCreators mobile app using **Flutter**, focused on modern educational content sharing.
- **Implemented** a clean and responsive **UI/UX** inspired by Figma designs, ensuring seamless navigation across modules.
- Built authentication and authorization modules using JWT, enhancing application security and access control.
- **Integrated Firebase Authentication** and **Cloud Firestore** for user login, registration, and real-time data management.
- Optimized server performance and ensured cross-platform compatibility, improving application reliability.
- **Worked on data validation and error handling**, ensuring accurate and consistent data flow across services.

### Web Developer Intern - NFTP **November 2022 - March 2023**
Onsite -Jamshoro, Sindh, Pakistan

- **Developed** multiple responsive pages and registration forms using **HTML, CSS, JavaScript, and React.**
- **Contributed** to intuitive employee dashboard designs using Bootstrap and React, improving navigation and reducing design iteration time **by 25%.**
- Created dynamic e-commerce features, including product catalogs and cart functionality, streamlining the shopping experience.
- Handle the Database and created a responsive front-end using **HTML, CSS and JavaScript.**
- **Optimized database** connectivity with **PHP** and **SQL**, boosting query efficiency and reducing response time **by 30%**.

## PROJECTS

### HydroScan – Final Year Project (Thesis & Project) **2025**

- **Developed** a satellite imagery–based system for monitoring puddles and sinkholes using machine learning and ensemble models.
- **Performed** exploratory data analysis (EDA), feature engineering, and model evaluation to ensure accurate prediction and detection.
- **Technology Stack:** Python, TensorFlow, Scikit-learn, OpenCV, NumPy, Matplotlib

### Public News App – Personal Practice Project **2025**

- **Built** a Flutter-based news app that delivers the latest headlines and category-wise news.
- **Applied** Flutter framework, clean and minimal UI design, seamless navigation,news channels, interactive cards,APIs.
- **Technology Stack:** Flutter, Dart, Material Design, REST APIs

### Predicting Student Grades **2024**

- **Built** a supervised machine learning model to predict student grades based on academic and personal factors.
- **Applied** Data preprocessing, feature selection, supervised learning algorithms, model training, model evaluation, accuracy measurement.
- **Technology Stack:** Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook.

### DSA Problem-Based Learning (PBL) – Semester Project **2023**

- **Implemented** fundamental data structures including Stack, Queue, and Binary Trees in Java.
- **Designed** and tested algorithms for efficient data handling and problem solving.
- **Technology Stack:** Java, OOP, Data Structures & Algorithms
